## Glucagon Growth Hormone Stimulation Test

Appointment Information	
Patient Name	Birthdate:
Date of Test:	Time:
The purpose of this study is to establish the pituitary's Growth Hormone releasing response to a stimulating agent. This study will use Glucagon as the stimulation agent. Set aside 6 hours for this test. We recommend someone drop you off and pick you up.	
Your Instructions	
<ul> <li>Make sure you eat something by midnight, the night before the test. Fast from midnight on with nothing to eat or drink with the exception of water.</li> <li>Refrain from strenuous physical activity or exercise before the test.</li> <li>Refrain from smoking on the day of the test.</li> <li>Ask your physician if it's ok to take your usual medications.</li> <li>Bring a meal and drink to consume after the test.</li> <li>Blood samples will be drawn at the start of the test and every 30 minutes there after.</li> <li>Take orally, 40 mg Propranolol 2 hours prior your appt. Arrive 1 hour prior to your appt time.</li> <li>Because this test takes at least 6 hours in total, we encourage you to bring along reading material or some other form of personal entertainment with ear-phones.</li> <li>Children should not be present during this test. Childcare should be arranged prior to your appt.</li> <li>This is generally a well tolerated test. Some common side-effects may include mild nausea, and vomitting. Should you notice any other side-effect, inform your health care provider.</li> </ul>
